

### Partnership for aquatic innovation (USA/BE)

SAR Consult visited Jim Lovell for the first time a few years back. He is the founder and Owner/Manager of the Consultancy firm “Confluence” in Montana, USA. We immediately found some common interest, and we quickly started sharing ideas with passion for aquatic and fish management and science.

We visited some river restoration works in Montana, and Jim came to visit us in Belgium in Oct. 2013 for a conference ([http://www.colloque.walphy.be/presentations/6\\_LOVELL.pdf](http://www.colloque.walphy.be/presentations/6_LOVELL.pdf)).

Confluence Consultancy Inc. ([www.confluenceinc.com](http://www.confluenceinc.com)) is now collaborating with advices for a specific project in Luxembourg to restore meanders in a flood plain, with all the benefits to Nature that it is bound to create.
